

# JERON'S HISTORY

## Over Fifty Years of Investment and Growth

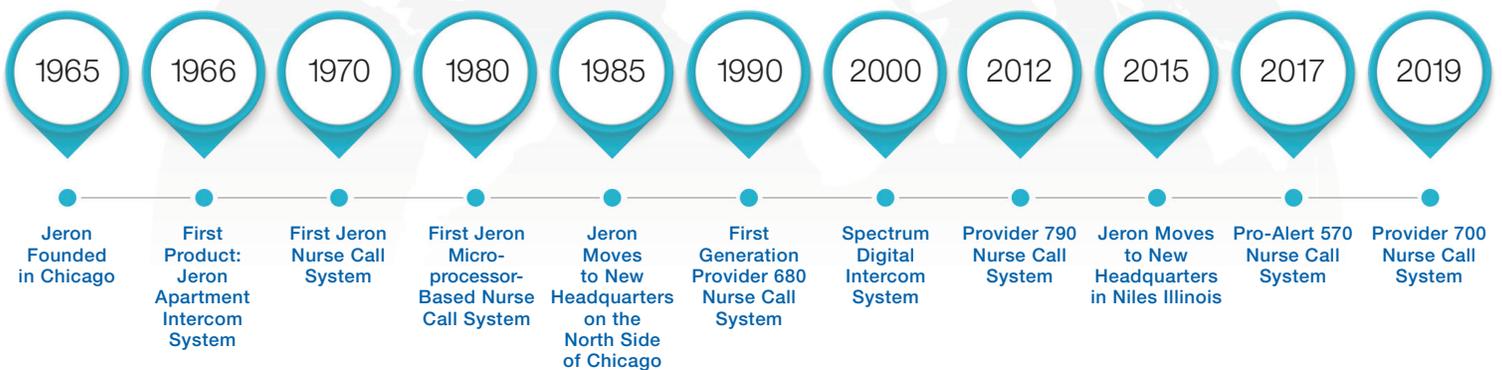

Jeron was founded in 1965 at a residence on the north side of Chicago. The “Jer” of Jeron is for Jerry Chesnul who is the C.E.O. and head of Jeron’s engineering department today. While Jeron systems are sold worldwide, Jeron Electronic Systems is still a family run business headquartered just ten miles from where it all began over fifty years ago.

In 2015, Jeron’s headquarters moved from Chicago to the nearby community of Niles, Illinois. The new Jeron headquarters provided the much needed additional space for manufacturing, a new engineering design and testing center, and a new end-user focused hands-on experience lab called the Provider Technology Center. From a single

room to the current home of Jeron’s headquarters, Jeron has maintained a family focus including a direct line of communication from customers directly to Jeron senior management; enabling a nimble product design and manufacturing process that meets ever changing customer needs.

# 50+ YEARS

# INTEGRATED NURSE CALL SOLUTIONS

## Intercom to Nurse Call

From its inception, Jeron focused on alerting and communication products starting with their first apartment intercom and access system.

Following apartment intercom, Jeron applied their design and manufacturing expertise to become a leader in other alerting and communications platforms in multiple markets including parking garages, correctional facilities, high-rise buildings, and healthcare.

In the mid-1970s, Jeron entered the healthcare market with their first nurse call platform. From the 1970s to today, Jeron designed and manufactured successive

generations of Pro-Alert and Provider Nurse Call platforms to meet the changes in modern healthcare communications. Through the years of experience gained working closely with their healthcare customers and leveraging significant advances in design and manufacturing technology, today Jeron offers a complete continuum of Pro-Alert and Provider Nurse Call Systems to meet the needs and budgets of healthcare facilities worldwide.

Assuring their customers of unparalleled reliability and safety, Jeron's Nurse Call systems are certified by Underwriter's Laboratories to the applicable UL 1069 standard for "Hospital Signaling and Nurse Call Equipment."

## Investing in the Future

Jeron continues to expand the functionality and scalability of their nurse call platforms. The recent introduction of the Provider 700 Nurse Call System, which seamlessly integrates with Jeron's flagship Provider 790 platform for the acute care market, is a testament to Jeron's continued drive to give their customers increasingly flexible, secure and scalable options for today's healthcare organizations.

## A Visit to Jeron

Customers have an open invitation to visit the headquarters in Niles, Illinois to see the full capabilities of Jeron. Under a single roof, visitors will see the start to finish of Jeron's Made in the U.S.A. systems from the design lab, through manufacturing, testing, warehousing and shipping. A tour of the headquarters includes a Provider Technology Center visit where clinical and technical visitors can experience the full breadth of Pro-Alert and Provider Nurse Call Systems' options and integrations.
