

Scalable Hardware Options to Create Your Perfect System

Provider 700 Nurse Call offers a complete selection of devices and options to create a customized solution for every staff, resident, and patient area.

All of the Provider 700 devices interconnect as a highly flexible and scalable networked solution supporting a single nursing unit, a single building, and all the way through to an entire campus.

Patient/Resident Room Choices to Match Every Environment

Provider 700 has the station choices to meet any room configuration. All stations are continuously supervised ensuring they will be available 24/7 and include built-in night lights so they can always be found. With a capacity of over 1,000 call priority levels and workflow events, Provider 700 can be utilized throughout your facility.

Bedside Stations

- Clear natural-sounding audio
- Feature bed side-rail communicator
- TV and light control options

Bath and Special Function Stations

- Pushbutton and pullcord call placement in the bathroom with audio communication option
- Large button and multi-button station options

Workflow/Status Stations

- Customizable buttons for:
 - Workflow alerts within and across departments
 - Automated rounding reminders
 - Room status such as fall risk
 - Staff presence within each room
 - Any level of call placement, from routine to urgent

Pillow Speakers and Call Cords

- Support for hospital grade and interactive television systems
- Large, easy to press buttons
- Sealed for easy cleaning

Dome Light Indications

- Indicate up to four different calls and events at a time
- Customizable colors and flash rates to meet each facility's needs
- Decorative wall sconce option

Alerting and Communications Options for Staff

Staff Consoles and Duty Stations placed in key staff areas ensure staff are always informed of active calls and workflows.

Touchscreen Staff Console

- Color graphical interface
- Customized operation and call coverage
- See all active patient/resident calls and caregiver service requests
- One-touch staff locating and communication, without disruptive overhead pages
- Text messaging to caregiver's wireless device

Duty Stations

- Visual and audible alerts of active patient/resident calls
- Hands-free staff to staff communications

Networked Nurse Call for the Most Popular Step-Saving Options

Linking all nursing areas together as a unified Provider 700 Nurse Call network supports a single point of integration for the most popular and step-saving options including:

Wireless SIP Phone Integration

Routes patient/resident calls directly to their caregiver's mobile phone; caregivers remain mobile and able to respond to calls

Automated Overhead Paging

Interfaced to the public address system, high priority patient/resident calls announce over paging speakers to alert caregivers to the events

Smartphone & Pager Messaging

Cost effective choices for receiving facility-wide text alerts of active patient/resident and staff calls. Call notifications route to assigned caregivers or caregiver teams' smartphones or pocket pagers

Interactive Television

A single patient device for nurse call, television control, lighting control, and patient/resident engagement/education

PC Console Activity Display

A real-time activity display available on any networked computer within the facility, allowing staff and managers to monitor nurse call activity and workflows in their area or across the entire facility

Cross Platform Integration

By sharing the same nurse call network, both Provider 700 and Provider 790 are designed to work together as a unified solution

Provider[®] 790
Nurse Call System

Real-Time Locating

Integrated with the most popular staff locating systems; caregivers automatically register into rooms so staff can easily find each other without disruptive overhead paging

A Complete Life-Safety Solution

Provider 700 Nurse Call System with integrations gives you a complete communications, alerting, rounding, and workflow solution. Explore the full breadth of Provider 700 staff, patient, and resident room components, LAN accessible software, and integration options to create a custom solution tailored to your facility.
