Scalable Hardware Options to Create Your Perfect System

Your Provider 790 Nurse Call Solution starts with the patient room and staff area devices that patients use to interface with caregivers, initiating requests and responses to alerts and workflows.

Patient Room Choices to Match Every Environment

Provider 790 provides multiple station options to meet any patient toom application or configuration. The call buttons and inputs for each station or terminal can be customized to match your terminology and the needs of each unit. In the bathroom, for example, the audio bathroom station includes dual call levels: the pullcord places an urgent call with the pushbutton is used for routine requests.

Patient Stations

- Continuously supervised
- Customized call priorities
- Integrated auxilary alarm input and call buttons
- Feature bed siderail communications
- Natural sounding full-duplex audio

Bath & Special Function Stations

- Built-in LED night light
- Customizable call priorities & labels
- Two-level pullcord stations: assist call button & emergency pullcord
- Unique button labels for your specific facility and workflow or clinic operations
- Integrated auxilary alarm input and call buttons
- Choice of standard or audio bathroom stations
- Two-Level pullcord stations: assist call button and emergency pullcord
- IP68 Rated water proof shower station
- High Security stations (and dome light) flush design meets anti-ligature requirements while still being able to easily alert and communicate with staff

Pillow Speakers

- Nurse, Pain, Water, & Toilet calls with individual call placed indicator
- Large, easy to press call buttons
- Sealed for easy cleaning

Dome Light Indications

- Programmable colors and light indications including flashing, solid, or sequencing that identifies active events
- Maintenance-free and highly visible LED indicators

Custom Call Tones, Call Priorities, Notifications, and Alerting

Every call can be configured to match your facility's terminology and designators including the call display at nurse consoles, workflow stations, wireless devices,and domelights. Even the call tones can be programmed to match prior nurse call tones or can give voice prompts describing the active call.

With a capacity of over 1,000 call priority levels and workflow events, you won't be restricted from extending Provider 790 into new areas and environments.

Flexible Alerting, Workflow, and Communication Options for Staff

Touchscreens can be located throughout the unit and in key staff locations for convenient access to all communications, alerting, workflow, and staff-locating features.

From any touchscreen staff can:

- One-touch staff to staff intercom within the unit and across the entire facility
- Request supoort
- See all active patient calls and service requests
- Reach caregiver team members via wireless devices
- Locate and communicate with staff without overhead paging

PATIENT ROOMS

Workflow Terminal and Station

Two touchscreen options to meet the needs of every patient area. Both options include a configurable graphical interface with 24 or 150 customizable touchpoints for:

- Automated patient rounding and reminders
- Inter-and intradepartmental workflows
- Procedure timer
- Staff presence
- Call placement
- Patient rooming and status
- Clinician sequencing

150 Touchpoint Terminal adds:

- One-touch intercom to any terminal or console (facility-wide)
- Integrated code call timer
- Staff log-in for full Nurse Console Operation

NURSING STATIONS & STAFF AREAS

Touchscreen Nurse Console

- Wall-mount or desktop options
- Color graphical interface
- Configurable call coverage areas and call types
- Review and answer calls
- One-touch staff locating and communication
- Set and review service requirements, roundings, and reminders
- Supports both Nurse Console & Clinic/ASC operation

HALLWAYS & INTERSECTIONS

Touchscreen Annunciator Station

Large, easy-to-read touchscreen display station:

- Configurable call coverage areas and call types
- Annunciates highest priority calls first
- Tone volume control and mute with automatic resound
- At-a-glance indication of staff presence or service requests

Scalable Nurse Call Network

Provider staff and patient devices interconnect with one dedicated life safety Voice over IP-based network, to provide a comprehensive Nurse Call solution. Utilizing standardized network cabling and continuously supervising all devices to ensure every component of the system is operational 24/7.

Provider 790 supports a single nursing unit, one hospital building, or an entire hospital campus.
