

No Supply Delays for Nurse Call and Area of Rescue Systems Manufactured by Jeron Electronic Systems, Inc.

FOR IMMEDIATE RELEASE

NILES, IL – March 30 – Unlike the ongoing supply chain issues experienced by many industries, as a U.S. manufacturer, Jeron Electronic Systems has had no delays in supplying systems and components for existing and new nurse call and area of rescue customers. While following all safety protocols over the last two years, Jeron continued manufacturing throughout the pandemic. This continued availability of Jeron systems and parts has allowed healthcare and commercial facilities to keep their existing systems running and enabled Jeron to replace aging and obsolete systems in a timely manner.

As a family run business, Jeron anticipated large supply issues and ordered the components needed to manufacture Provider[®] Nurse Call Systems and Pro-Alert[™] Area of Rescue Systems. Jeron's forward-planning perspective also included adding increased production capacity within the last year to meet growing demand.

Beth Machall-Dwyer of Jeron's Distributor, New Era Technology remarks, "If we can't deliver to our hospitals or the healthcare facilities that we work with, they potentially can't open their doors. Jeron is a USA company where everything is designed, engineered, manufactured, and shipped; this is huge right now."

Jeron began in 1965 at a residence on the north side of Chicago. Jeron systems are now sold worldwide, while still being a family run business headquartered just ten miles from where it all began over fifty years ago.

Jeron provides Nurse Call solutions for hospitals and other healthcare markets and Life Safety Two-Way Communications for commercial buildings and residential facilities. Utilizing the latest in VoIP (Voice over IP) and enterprise-ready technology, Jeron's Provider[®] Nurse Call and Pro-Alert[™] Area of Rescue meets the needs of patient to-staff and staff-to-resident communications for alerting, call activity reporting, one-touch workflows, and much more.
