# Improving Patient Throughput By Efficient Workflow

Guiding clinicians, patients, and workflow through your ambulatory surgery center is seamless with **Provider 790 for Ambulatory Care**. Wall-mount displays indicate room status, indicators outside exam rooms direct clinicians to their next patient, and more. All of this is accomplished through a system of automated alerting technology.

Simplified Facility-Wide Processes

- Directs clinicians to their next patient and indicates all patients waiting

- Each corridor dome light indicates patient's status, room's status and clinician requests

- Reporting option confirms accurate response and patient throughput

- Automatic memory for each room; controlling patient/room status and sequencing caregivers

- "VIP" status allows a room to be moved to beginning of the priority queue

- Alert staff to critical events such as Code, Staff Emergency, or Assist needed

Provider Nurse Call Alerting & Workflow

Multiple workflow station options available for each exam/procedure room

Button-press for status change

Indicators outside of each room illuminates status changes

Central touchscreen terminal indicates each room's status

Large whiteboard displays multiple room/staff/patients
