

FROM HOSPITALS TO CLINICS

One Platform, Every Clinical Setting, Countless Connections:
A Unified Solution for Patients and Caregivers

The Provider[®] 790 Nurse Call and Workflow Solution drives **tangible benefits for patients and clinicians**. Its **innovative technology supports a single unified solution** linked seamlessly across all healthcare environments.

**Optimizing Patient Care for
Improved Outcomes**

Provider[®] 790

Nurse Call & Workflow Solutions

Healthcare is complex and constantly evolving to address patient and staff safety, workforce shortages, and outdated technologies. Jeron's **next generation nurse call** platform is a **complete staff and patient solution** that unifies communication, alerting, mobility, and workflows across all care environments—acute, behavioral, clinics, and ambulatory surgery centers.

The Provider 790 Nurse Call and Workflow solution supports the latest integration tools that seamlessly connect to your existing systems and equipment.

- Improve safety and response time with **smart alerting; where you need it, when you need it**
- Reduce wait time with **direct wireless communication and device alerts** to mobile caregivers
- Streamline workflow with **one-touch inter and cross-departmental requests**
- Support quality improvement and benchmark performance with **advanced analytic reporting**
- Eliminate duplicated processes with **bi-directional EHR integration**
- **One platform with many solutions for ALL service lines of care:** acute, long term, behavioral, clinics, and ambulatory surgery

Efficient Clinical Workflows

Integrated workflows transform traditional 'nurse call', eliminating overhead pages and streamlining staff-to-staff communication with one-touch alerts:

- Set care and rounding reminders with EHR documentation
- Collaborate with team members
- Communicate with ancillary services for spills or transportation
- Room status and turnover notifications

Right-sized workflow options available from 4 to 150 workflows and events.

Patient Safety & Satisfaction

Having the right tools is essential! Timely access to accurate information can mean the difference between a positive outcome and a preventable error. With **real-time patient status directly from the EHR** (fall risk, NPO, allergies), information illuminates at the dome light outside each patient's room, **informing caregivers** of specific protocols to follow.

Patients can also directly request assistance to or from the toilet, water, or pain; these specific requests automatically route to the appropriate staff, saving time and steps. **Integrated, automated rounding reminders** reassure patients that they will see caregivers within a set time, **enhancing patient safety and satisfaction**. For behavioral health settings, there is a complete selection of durable devices including heavy-gauge, anti-ligature stations for alerting and communications.

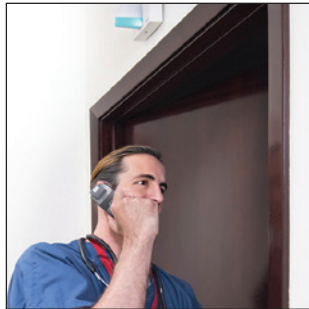

Staff Safety

Real-time information enables proactive care: minimizing risk, enhancing situational awareness, and improving overall staff safety. For high-risk patients, support staff can monitor in-room interactions from remote locations.

If a situation escalates, staff can activate strategically located **emergency buttons** or press the wireless emergency call button on their real-time locating tag to **immediately alert additional staff**.

Wireless Alerting and Communications

Patient calls route **directly to their caregiver's wireless device** indicating the location and type of call. Caregivers can remotely answer calls to determine a patient's needs. If a caregiver is busy, the call automatically reroutes to another team member's mobile device.

To support a quiet nursing unit and minimize alarm fatigue, in-room **alerts from medical devices** (ventilators, pulse ox, infusion pumps) and bed exit alarms **annunciate on caregivers' wireless devices**.

A Total In-Room Solution

Scalability and seamless **integrations extend throughout the room** by giving patients control over their environment including TV, lighting, and shades.

Key smart bed information can be integrated to display the brake status and other safety statuses while integrated **electronic patient care boards** in the room relay real-time information to patients and staff. When **integrated with virtual nursing**, patients can communicate instantly with a remote caregiver.

Clinics and Ambulatory Surgery Centers (ASCs)

Provider 790 readily **scales from acute care to clinics and ambulatory surgery centers** to support a positive patient experience and ROI.

One-touch directs caregivers to their next patient, minimizing patient wait times, and indicating patient status

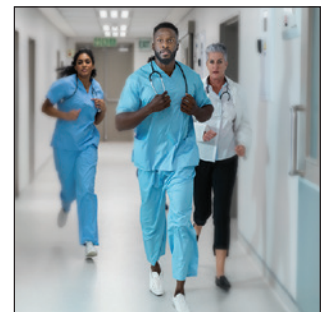

in each exam or procedure room. This clinic functionality instantly streamlines patient visits, increases throughput and improves financial performance.

Code Blue and Rapid Response

Multiple facility-wide alert options simultaneously **notify primary caregivers and rapid response or code blue teams**.

A single team alert button press activates automated overhead pages, group text alerts to team phones or pagers, call annunciation on nurse consoles and calls on large displays in key staff areas. These alerts include the room number, location, and call description. Even a remote telephone switchboard can answer the urgent call to verbally acknowledge that the crash team has been dispatched.

Reporting & Analytics

The preconfigured **reporting software empowers nurse leaders with actionable insights** to enhance patient care and staff efficiency with a robust reporting package:

- Monitor and analyze response times to patient requests
- Identify bottlenecks to address delays in care
- Validate time spent at the bedside
- Identify unit trends, best practices, rounding performance, and augment staff planning

Interoperability

Provider 790 leverages **technology** standards for SIP, bi-directional HL-7 (IHE), Ethernet, fiber networking, SQL and VoIP. These key interoperability standards **fully support a growing range of integrations and easily adapt to emerging trends** in healthcare.

INTEGRATIONS:

- Medical Records (EHR)
- TV, Lighting, and Shades
- Electronic Whiteboard
- Virtual Nursing
- Smart Beds
- Mobile Devices
- Real-Time Locating
- Equipment Alarms

Best Value Solution

By sharing a common network and utilizing the latest integrated technology, Provider 790 leverages the Provider 700 platform to **operate as a single unified solution, making Provider the most scalable nurse call solution on the market.**

 **Provider® 790**

&

 **Provider® 700**

This flexible, cross-platform integration allows the systems to be intermixed throughout the facility, delivering **maximum value as a comprehensive, facility-wide solution.**

Provider® TECHNOLOGY CENTER

Clinical and technical users can **experience the full capabilities of Provider 790 through in-person or virtual demonstrations** at our interactive technology center showroom.

Experience the power of next-gen technology during a hands-on demo and collaborative clinical design workshop. Together, we'll explore real-world scenarios to reimagine workflows, improve efficiency, and elevate the patient and staff experience!

About Jeron

Founded in 1965, Jeron has grown into a leading communications manufacturing company with systems utilized around the world. **Proudly family-owned, Jeron systems are designed and manufactured in the USA.** Jeron maintains complete quality control throughout every stage of production, **ensuring timely delivery, consistent performance, and exceptional customer satisfaction.** Jeron proudly supports its quality designs and manufacturing with an industry leading 5-year warranty.

Provider 790 is certified by Underwriter's Laboratories to the UL1069 nurse call safety and reliability standard, and Jeron is also an FDA registered nurse call system manufacturer.

Service and Support

As a critical life-safety system, this fully supervised solution is designed and built for 24/7 availability. To ensure maximum uptime, Jeron partners with the **best-in-class distributors.** These Jeron factory trained and certified distributors are **local to you** – ready to deliver turnkey solutions and **provide prompt on-site service** and emergency repairs when it matters most.
