Staff Mobility and Team Nursing:

Connecting mobile caregivers with their patients helps speeds response to patient calls. In emergency situations, calls are routed to the nearest team members or an entire team, all at the same time.

Call Activity Logging and Reporting:

With Provider Executive Information System software, all patient and staff interactions are logged. Clinical managers can easily monitor call activity and response times to identify issues that could affect patient safety or satisfaction.

Clinics & Ambulatory Surgery Centers:

Provider 790 brings its industry-leading workflow, alerting, and communications technology to ASC and clinic settings. These outpatient areas can share the same Provider integrations and reporting options as part of a complete facility-wide solution.

Provider[®] 790

Nurse Call & Workflow Solutions

Scalable Hardware Options:

Provider 790 has a broad selection of hardware options to meet the alerting, notification and workflow needs of every staff and patient location within a facility. Each area can be customized as part of a facility-wide solution.

[CLICK HERE](#)

Smartphones for Alerting:

Jeron's own Noti-Fi smartphone application brings alerts and communications to caregivers using the facility's Wi-Fi network. Supporting caregivers in teams, Noti-Fi automatically reroutes a patient call to another caregiver if the first one is busy.

[CLICK HERE](#)

Improving HCAHPS Patient Satisfaction:

Positively affect satisfaction and safety through Provider's alerting and workflow options. By giving caregivers everywhere access to active patient calls and automated workflows, Provider 790 supports quick responses to improve patient satisfaction.

[CLICK HERE](#)

Streamlining Facility-Wide Workflows:

With a push of a button, tasks are initiated within a team or across an entire facility. The automated workflows alert staff over mobile devices or graphic displays in key staff areas.

[CLICK HERE](#)

Code Blue & Rapid Response Solutions:

A facility-wide solution for high priority calls such as code blue and rapid response means a single button push instantly alerts an entire response team across the entire facility.
